Passionate Software Engineer with a strong Foundation in Computer Science and a Certification in Full-Stack Web Development. Seeking an entry-level position in software Engineering or related roles to apply my technical prowess, problem-solving skills, and project management abilities. Eager to contribute to innovative teams and drive impact projects in the evolving world of technology. With a proven track record of technical excellence, a commitment to innovation, and the drive to succeed in software engineering. I am excited to contribute my skills to a forward-thinking team. I look forward to the opportunity to discuss how my expertise aligns with your organization's goals.

## Education and Certifications:

- Bachelor of Science in Computer Science (Expected Graduation: June 2024)  
Relevant Courses: Software Engineering, Database Management, Algorithms, Project Management Fundamentals (CGPA: 10.67)
- Entrance Scholarship (2019-2020)
- Certificate of Completion in Full-Stack Web Development, August 2021, Carleton University coding bootcamp

## Technical skills:

- Proficient in web technologies: HTML/CSS, JavaScript, Express, React.js, MySQL and MongoDB
- Experienced in other programming languages: python, java, and C/C++ and Scala
- Ability to build REST API
- Strong analytical and quantitative skills
- Experience with software design patterns
- Project Management: Adept at planning, organizing, and executing projects to achieve deliverables within set timelines and budgets. Knowledgeable about project methodologies and tools, including Agile and Scrum.
- Knowledge of modern JavaScript frameworks such as Mocha, Chai and Angular
- Good understanding of data structures, Algorithms, and software design
- Familiarity with Linux
- Experience with version control systems like Git

## Soft skills:

- Excellent communication skills, both written and verbal

- Demonstrates empathy and adaptability in dynamic environments.
- Proven leadership skills, as demonstrated through my experience as Senior-Prefect at Christ the king catholic college, odolewu-ijebu, Ogun state, Nigeria.
- Strong Team player and collaborator

## Experience:

### **Software Engineering intern, Daewoo Nigeria Limited, Lagos, Nigeria, June 2022 – August 2022**

- Collaborated with a team of engineers on the development of software solutions for engineering and procurement projects.
- Contributed to designing, coding, testing, and debugging software applications, enhancing efficiency in project execution.
- Gained hands-on experience in software development lifecycle and best practices in a professional engineering setting.

### **Shipment Receiver, Farm Boy, Ottawa, May 2021-August 2021**

- Received and shipped all products from the suppliers and maintained strict inventory control.
- Communicated all overages and shortages to inventory control manager upon receiving.
- Preserved the quality of all products in production facility.

## Applied Projects:

- **The Ultimate Personality Pet Finder Application:** <https://ayomideawonaya21.github.io/The-Ultimate-Personality-Pet-Finder/>  
**Description:** An Interactive and responsive pet finder application that allows users to take personality and lifestyle quizzes to find pets up for adoption near them.
- **Password Generator:** <https://ayomideawonaya21.github.io/password-generator/>  
**Description:** An application that solves the problem of thinking of unique passwords for different purposes by creating one for its user.
- **Ayo21's Weather Dashboard:** <https://ayomideawonaya21.github.io/weather-dashboard/>  
**Description:** A weather Application that tells the weather condition of any given city at any time of the day.
